12. **Equations of phase-locked loops : Dynamics on circle, torus and cylinder. D2 - 4.2023** / Jacek Kudrewicz, Stefan Wąsowicz. _ Singapore : World Scientific, 2007. _ 226tr; 24cm. _ (World Scientific series on nonlinear science. Series A ;Vol. 59)

Includes bibliography and index.

Tóm tắt: Phase-Locked Loops (PLLs) are electronic systems that can be used as a synchronized oscillator, a driver or multiplier of frequency, a modulator or demodulator and as an amplifier of phase modulated signals. This book updates the methods used in the analysis of PLLs by drawing on the results obtained in the last 40 years.

14. **Topics on stability and periodicity in abstract differential equations. D2 - 4.2023** / James H Liu, Gas M N'Guerekata, Nguyen Van Minh. _ Singapore : World Scientific, 2008. _ 208tr; 24cm. _ (Series on concrete and applicable mathematics ;Vol. 6)

Includes bibliography and index.

Tóm tắt: This book presents recent methods of study on the asymptotic behavior of solutions of abstract differential equations such as stability, exponential dichotomy, periodicity, almost periodicity, and almost automorphy of solutions. The chosen methods are described in a way that is suitable to those who have some experience with ordinary differential equations. The book is intended for graduate students and researchers in the related areas.

Includes index.

Tóm tắt: This book explains the workings of the normal kidney, illustrates the aetiology and pathophysiology of acute renal disease, and provides practical treatment guidelines relevant to the day-to-day needs of the practising clinician. There is a clear emphasis on the underlying pathogenic mechanisms naturally leading to a full understanding of the rationale behind the recommended treatments. Each chapter is illustrated throughout by coloured tables and diagrams, and incorporates unique easy-to-follow “practice points” algorithms which detail, step-by-step, the precise treatment protocols required to succeed in caring for these complex patients.

Includes index.

Tóm tắt: Cancer treatment has enjoyed half a century of healthy development, relying mainly on surgery, cytotoxic therapy and radiation. Achievements and successes are well reflected in the longer survival period and better quality of life. Nonetheless, cancer still spreads locally, recurs, metastasizes and remains one of the top killers. Instead of concentrating on cancer removal, it has become obvious that supportive measures are also important. These include the means to improve quality of life during treatment and to contain tumor growth. To this end, herbal medicine appears to offer holistic support via as yet unknown pathways. This volume reveals the practice of cancer treatment using herbs from all over the world, including China, India and Japan....
