1. **From biotechnology to genomes : The meaning of the double helix** / Philippe Goujon. _ New Jersey : World Scientific, 2001. _ 782tr ;24cm

Tóm tắt: Aimed at scientists and non-specialised readers alike, this book retraces the source of national and international biotechnology programmes by examining the origins of biotechnology and its political and economic interpretation by large nations. With a foreword by André Goffeau, who initiated the European Yeast Genome Project, the book describes the achievements of the first genetic and physical maps, as well as the political and scientific genesis of the American Human Genome Project. Following these advances, the author discusses the European biotechnology strategy, the birth and implementation of European biotechnology programmes and the yeast

2. **Hormones and their receptors in fish reproduction : Molecular aspects of fish and marine biology** / Philippa Melamed, Nancy Sherwood. _ New Jersey : World scientific, 2005. _ 297tr ;24cm

Số phân loại : 571.8417

Số ĐKCB : 00000021685 - 00000021694

3. **Lecture notes quantum mechanics** / Samuel D.Lindanbaum. _ Singapore : World Scientific, 1999. _ 343tr ;23cm

Số phân loại : 530.12

Số ĐKCB : 00000021809 - 00000021814

4. **Lepton dipole moments** / B Lee Roberts, William J. Marciano. _ Singapore : World Scientific, 2010. _ 757tr ;23cm

Tóm tắt: This book provides a self-contained description of the measurements of the magnetic dipole moments of the electron and muon, along with a discussion of the measurements of the fine structure constant, and the theory associated with magnetic and electric dipole moments. Also included are the searches for a permanent electric dipole moment of the electron, muon, neutron and atomic nuclei. The related topic of the transition moment for lepton flavor violating processes, such as neutrinoless muon or tauon decays, and the search for such processes are included as well. The papers, written by many of the leading authors in this field, cover both the experimental and theoretical aspects of these topics.

Số phân loại : 160

Số ĐKCB : 00000021610 - 00000021614

6. **Lorentz and Poincaré invariance : 100 years of relativity** / Jong-Ping Hsu, Yuan-Zhong Zhang. _ Singapore : World Scientific, 2001. _ 583 tr ;25cm

Tóm tắt: This collection of papers provides a broad view of the development of Lorentz and Poincaré invariance and spacetime symmetry throughout the past 100 years. The

issues explored in these papers include: (1) formulations of relativity theories in which the speed of light is not a universal constant but which are consistent with the four-dimensional symmetry of the Lorentz and Poincaré groups and with experimental results, (2) analyses and discussions by Reichenbach concerning the concepts of simultaneity and physical time from a philosophical point of view, and (3) results achieved by the union of the relativity and quantum theories, marking the beginnings of quantum electrodynamics and relativistic quantum mechanics. Ten of the fundamental experiments testing special relativity are also discussed, showing that they actually support a four-dimensional spacetime based on broad Lorentz and Poincaré invariance which is more general than and includes the special theory of relativity. The generalization of the concepts of simultaneity, physical time and the nature of the speed of light within a four-dimensional spacetime framework leads to the conclusion that the symmetries embodied by the special theory of relativity can be realized using only a single postulate — the principle of relativity for physical laws.

10. **Pacific Symposium on Biocomputing 2006** / Russ B. Altman, A.Kaith Dunker, Lawrence Hunter, Tiffany Murray, Teri E. Klein. _ Singapore : World Scientific, 2006. _ 607 tr ;24cm

Tóm tắt: The Pacific Symposium on Biocomputing (PSB 2005) is an international, multidisciplinary conference for the presentation and discussion of current research in the theory and application of computational methods in problems of biological significance. This latest volume in the prestigious conference series contains the contributions of top researchers from the US, the Asia-Pacific region and around the world. Sections are devoted to databases, algorithms, interfaces, visualization, modeling and other computational methods, as applied to biological problems, with emphasis on applications in data-rich areas of molecular biology. The book is an essential source of ideas, discoveries and references for academics in biocomputing, bioinformatics researchers and computer scientists. The proceedings have been selected for coverage.

11. **Recent developments in theoretical physics** / Subir Ghosh & Guruprasad Kar. _ Singapore : World Scientific, 2010. _ 423 tr ;24cm. _ (Platinum jubilee series; Statistical science and interdisciplinary research ;v. 9)

Tóm tắt: A concise, clear writing style and a detailed and rich coverage of topics are the reasons that students found the first edition of the book so engaging and useful. Riding on this wave, all chapters within the second edition of this popular book have been thoroughly updated and expanded, especially

the human and animal materials. A wider range of animals is covered, including dogs and cats as well as farm animals. The use of cord blood for therapy, pre-implantation genetic diagnosis and animal cloning are also explored and dealt with.

17. **An Inframarginal Approach to Trade Theory (Increasing Returns and Inframarginal Economics)** / Xiaokai Yang, Wenli Cheng, Heling Shi, Christis G. Tombazos. _ Singapore : World Scientific, 2005. _ 523tr ;23cm

Tóm tắt: Inframarginal analysis represents a methodology that extends marginal analysis, using non-classical mathematical programming, in efforts to investigate corner solutions and indivisibilities. As such this approach has been used to reintroduce classical insights regarding the division of labor and economic

organization to the mainstream of economic inquiry. One of the most prolific and useful relevant applications of inframarginal analysis concerns the area of international trade theory. The ensuing field of study has attracted considerable -- and rapidly expanding -- interest in recent years. Yet, little has been done by way of organizing the accumulated knowledge in a single volume. This book fills that gap by collecting key articles that mark distinct stages in the evolution of research in the area of inframarginal applications to trade theory. In this context the volume represents an excellent introduction of this novel and exciting field of study to the new researcher, and an invaluable source of reference to those seasoned in inframarginal applications to trade theory.

19. **Sovereign Wealth: The Role of State Capital in the New Financial Order** / Justin O'Brien, Renee A. Fry, Warwick J. McKibbin. _ Singapore : Imperial College Press, 2011. _ 206 tr ;25cm

Tóm tắt: As the first major collection of papers on sovereign wealth funds and state-owned enterprises, this book provides an essential guide to the geo-political impact of these pools of capital on global markets. The rise of sovereign wealth funds and state-owned enterprises represents a fundamental shift in market dynamics. The potential fusion of political and commercial imperatives raises unresolved geo-political questions that have been sharpened by the vaporization of credit markets as a consequence of the global financial crisis. State-controlled pools of capital have now eclipsed hedge funds and private equity in terms of funds under management, and the question of their regulation is therefore now of utmost importance. This book highlights the interplay between legal, corporate and policy imperatives associated with the regulation of

state capital. Including contributions from leading practitioners, policymakers and academics, it provides an essential guide to professionals and academics in the fields of finance and business.
